Computer Science 2 Project	Team Members:	Audrey Uhma G. Salentes
Group Progress Report		Hannah Rouella T. Tan
4th Quarter		
Week 3 - April 1, 2026		
GOAL	DATA COLLECTED	PROGRESS
Clean up bugs		Not complete
Remove all placeholders and add actual labels		Not complete

STRENGTH		
The system includes an automatic expiry filter		
Users can view other user profiles		
The app dynamically handles session-based state management		

AREAS FOR DEVELOPMENT		
No password security (passwords are stored in plain text)		
No data persistence (all users and announcements are lost when the app restarts)		
Still placeholder names.		

STRATEGY FOR SUCCESS		
Improve data security by implementing password hashing.		

Enhance user experience by adding persistent storage (database or file system) so announcements and accounts are saved permanently.
