Add placeholder names for batch offic	User roles and data structure created	Incomplete(missing actual no. of BO)	
Add placeholder names for ALAs	10 ALAs were (placeholder) predefin	Incomplete(missing actual no. of ALA)	
Add ability to comment	Comment system data stored per an	Complete	
STRENGTH			
The system already supports multiple user roles (student, admin, president), making it flexible and realistic.			
Key features like posting announcements, filtering, and commenting are functional and integrated.			
AREAS FOR DEVELOPMENT			
Missing detailed ALA data (only placeholders exist; no real ALA names or counts yet).			
User information is limited (no storage of grade-section, advisory sections, or student type after signup).			
STRATEGY FOR SUCCESS			
Expand the database structure to store all user inputs (grade, section, advisory roles) for better account tracking.			
Replace placeholder ALAs with actual data and improve UI (especially for mobile/web layout clarity).
